Implementation Roadmap & Next Steps

Recommended Launch Sequence

Given your global presence and lean-team mandate, the following phased launch is recommended:

- Phase 1 (Months 1–3): Launch 3 products and 2 services per vertical — starting with AI, Digital Marketing, and Accounting (highest demand, fastest revenue). Build once, sell repeatedly.
- Phase 2 (Months 4–6): Add Cyber Security and HR Services. Activate WhatsApp + LinkedIn lead funnels for each vertical.
- Phase 3 (Months 7–12): Full launch of Corporate Law and Business Coaching verticals. Build cohort-based programs to multiply revenue per client.
- Phase 4 (Year 2+): Geographic expansion — UAE, UK, Canada, Singapore — using the same product stack with local compliance overlays.

Financial Model — Phase 2 (Coming Next)

The 5-Year Financial Model covering Project Cost, P&L, Balance Sheet, and Cash Flow Statement will be prepared as a separate Excel workbook. Assumptions will be built on the pricing ranges and scalability models defined in this catalog.
